Acupanel® Panel Accessories

The Acupanel® accessories range is designed to work directly with your panel wall, adding function and character without compromising the finish. The collection divides into two systems.

The **screw-based range** includes hooks, brackets, shelves, boards, and storage accessories, all installed by screwing directly into the felt backing between the slats. Rated to 5kg, easy to install with a screwdriver, and available in black steel.

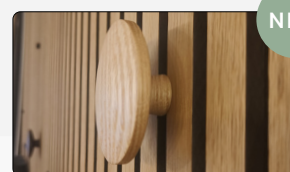

The **widget-mounted range** includes four shelf designs, from the compact Small Shelf to the 400mm Large Shelf, plus a Turned Hanger in real wood veneer across three finishes: oak, walnut, and black oak. All mount using a widget that fits between the slat gaps, with the screw cap locking each accessory firmly in place, leaving no marks on the panel if you choose to move them. Tested to 10kg. Every fixing is included in the box.

Installation	Screw through felt	Widget	Widget
Maximum hold weight	5kg	10kg	10kg
Anti-slip EVA felt	❌ No	✅ Yes	❌ N/A
Compatible panels	Original Acupanel® Acoustic Panels, which includes Wood, Colour, Metal, and Stone collections. Also compatible with Drew & Jonathan™ x WVH® Grainmatch and Drew & Jonathan™ x WVH® Acoustic Wood panels	Original Acupanel® Acoustic Panels, which includes Wood, Colour, Metal, and Stone collections. Also compatible with Drew & Jonathan™ x WVH® Grainmatch and Drew & Jonathan™ x WVH® Acoustic Wood panels	Original Acupanel® Acoustic Panels, which includes Wood, Colour, Metal, and Stone collections. Also compatible with Drew & Jonathan™ x WVH® Acoustic Wood panels
Care & maintenance	Wipe accessories clean with a damp cloth. Do not use abrasive cleaners or solvents on the steel.	Wipe steel shelf bodies with a soft, dry cloth. Do not use abrasive cleaners or solvents on the powder-coated steel or the EVA felt lining. The felt can be spot-cleaned with a lightly damp cloth if needed.	Wipe the wood veneer body with a soft, dry cloth only. Avoid moisture on the veneer surface.

*The Accessories are designed to fit the Acupanel® Acoustic panel range, which includes the Wood, Colour, Metal and Stone collections. They are also compatible with the Drew & Jonathan Home Acoustic Wood panels. See chart above for details.

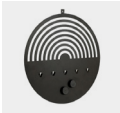

Dimensions

Product image	Product name	Material	Dimensions per product (mm)	Maximum holding weight (kg)	Weight per product (kg)
	Ledge Shelf Large	Black powder-coated steel	400(L) x 111(W) x 44(D)	5kg	0.8kg
	Ledge Shelf	Black powder-coated steel	200(L) x 111(W) x 43(D)	5kg	0.4kg

Installation instructions for Screw-Based Shelves & Hooks

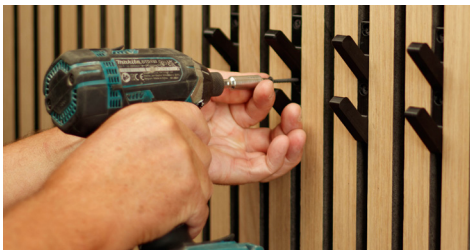

Tools needed

Screws

Level

Hand Drill

How to install the **Hooks**

Step 1:

Unpack your hooks from their packaging and prepare your tools.

Step 2:

Choose where you'd like the hooks to go on your panel, and push in the hook into the slot gap. Line up with a level to ensure they are straight.

Step 3:

Drill into the felt where you'd like the hooks to be, and using the holes on the back of the hook, align the holes and push slightly down to lock them in place.

How to install the **Shelves**

Step 1:

Unpack your shelving parts from the packaging and prepare your tools for install.

Step 2:

Choose where you'd like the shelf to go on your panel, with the screw holes being placed into the felt gaps. Line up with a level to ensure it's straight.

Step 3:

Drill the screws into the screw holes and through the panel felt until the shelf is secure into the wall. Before drilling, please ensure you do not drill into pipes or wires.

How to install the **Wine Holder**

Step 1:

Unpack your wine holder parts from the packaging and prepare your tools for install.

Step 2:

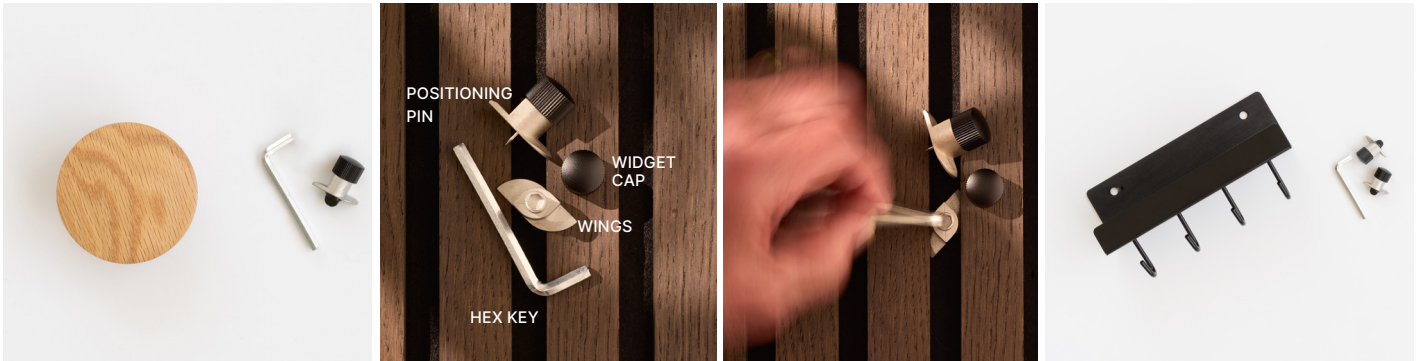

Choose where you'd like the wine holder to go on your panel, and push the first part into the slot gap. Line up with a level to ensure it's straight.

Step 3:

Drill the screws into the screw holes and through the panel felt until the wine holder is secure. We recommend installing the second part of the wine holder three slats across, to best fit most bottle sizes. Before drilling, please ensure you do not drill into pipes or wires.

Installation instructions for Widget-Mounted Accessories

Installing the Turned Hanger

Tools needed

Widgets — included in the box: 1 per hanger
Hex key — included in every box

Step 1: Check your panel type to ensure compatibility before beginning. Reference “Turned Hanger” on the chart on [page 3](#).

Step 2: Measure and mark the position for the hanger on your panel wall. The widget sits between the slat gaps, so identify the gap that corresponds to your chosen height.

Step 3: Take the widget from the box. Orient it so the wings (the thin projecting tabs, up to 6mm wide) face into the slat gap. Slide the widget between the slats from the front.

Step 4: Rotate the widget 90 degrees so the wings locate behind the panel slats. The widget should now be held loosely in position.

Step 5: Using the included hex key, tighten the widget bolt. This draws the wings back and clamps the widget firmly against the back of the slat. Do not overtighten.

Step 6: Thread the hanger disc onto the widget stem from the front and tighten to secure using the hex key. The real wood veneer surface sits flush against the panel, with the stem protruding as the hanging point.

Step 7: The hanger is now ready to use.
Maximum load: 10kg.

Installing the Widget-Mounted Shelves & Hooks

Tools needed

Widgets — included in the box: 2 per shelf
Widget caps — included with shelves: 2 per shelf
Hex key — included in every box

Step 1: Check your panel type to ensure compatibility before beginning. Reference “Widget-Mounted Shelves & Hooks” on the chart on [page 3](#).

Step 2: Measure and mark the position for the shelf on your panel wall. The widgets sit between the slat gaps, so the shelf height will be determined by the gap positions. Mark the two gap positions that correspond to the shelf’s two mounting holes.

Step 3: Take the first widget from the box. Orient it so the wings (the thin projecting tabs, up to 6mm wide) face into the slat gap. Slide the widget between the slats from the front.

Step 4: Rotate the widget 90 degrees so the wings lock behind the panel slats. The widget should now be held in position.

Step 5: Repeat steps 3 and 4 for the second widget, at the second marked position.

Step 6: Check both widgets are level before proceeding. Adjust positioning if needed.

Step 7: Slot the shelf onto the two widgets. Each shelf has two holes that are spaced to match the slat spacing. Press the shelf back against the panel so it sits correctly on both widgets.

Step 8: Place the first widget cap over the widget stem, on the front face of the shelf. Tighten with the included hex key. The cap draws the shelf forward against the widget and locks it firmly in place between the cap and the panel.

Step 9: Repeat for the second cap. Check the shelf is level and firm before loading.
